

OUTDOOR LIGHTING

THE BOOK OF IN-LITE

in-lite®

make your outdoor space unique.

ENHANCES EVERYTHING OUTDOORS

THE NICEST PLACE IN YOUR HOME IS THE GARDEN

Until night falls and all the joy it brings simply disappears. Outdoor lighting from in-lite lets you discover how your garden can really come to life after dark. Lighting makes your lovely garden a magical place. Your eye is drawn to the elements that are illuminated: an amazing tree, a wonderful lounging area or a colourful border. While everything blends together during the daytime, lighting lets you create personal accents and your own magical place after dark. We think everyone should experience this for themselves.

For around 25 years now in-lite has been developing the perfect light for outdoor spaces. This has resulted in some of the most true-to-life lighting available on the market. The system operates on a low voltage, making it easy and safe for anyone to install. The fixtures are fitted with high-quality LEDs, which translates into low energy consumption and light that is as natural and inviting as possible.

Everything from the tallest tree to the smallest plant can be attractively illuminated with in-lite products. And the in-lite app lets you easily switch your lighting on and off, resulting in maximum convenience and complete control. Both coloured lighting and dimming are possible, and you can create new effects, contrasts and different colour combinations. In no time at all, you can transform your outdoor space into a magical place that can be enjoyed into the small hours, with in-lite enhancing everything outdoors.

NEW
IN 2024

MORE THAN A BRAND

in-lite is more than just an outdoor lighting brand. We're a company with a mission. This is done by developing beautiful outdoor lighting fixtures but above all by inspiring as many people as possible and showing that lighting belongs in every outdoor space. But that's not all we do. An extensive network of partners and landscapers have the exact same mission. We train these professionals in the in-lite Playground and inspire them with unique ways to use lighting. Together we make any outdoor space a unique place that you can fully enjoy well into the evening hours.

EASY TO INSTALL

- Easy to install
- Safe for humans and animals
- 100% waterproof system

QUALITY & DESIGN

- Suitable for any garden
- European design
- 5-year warranty

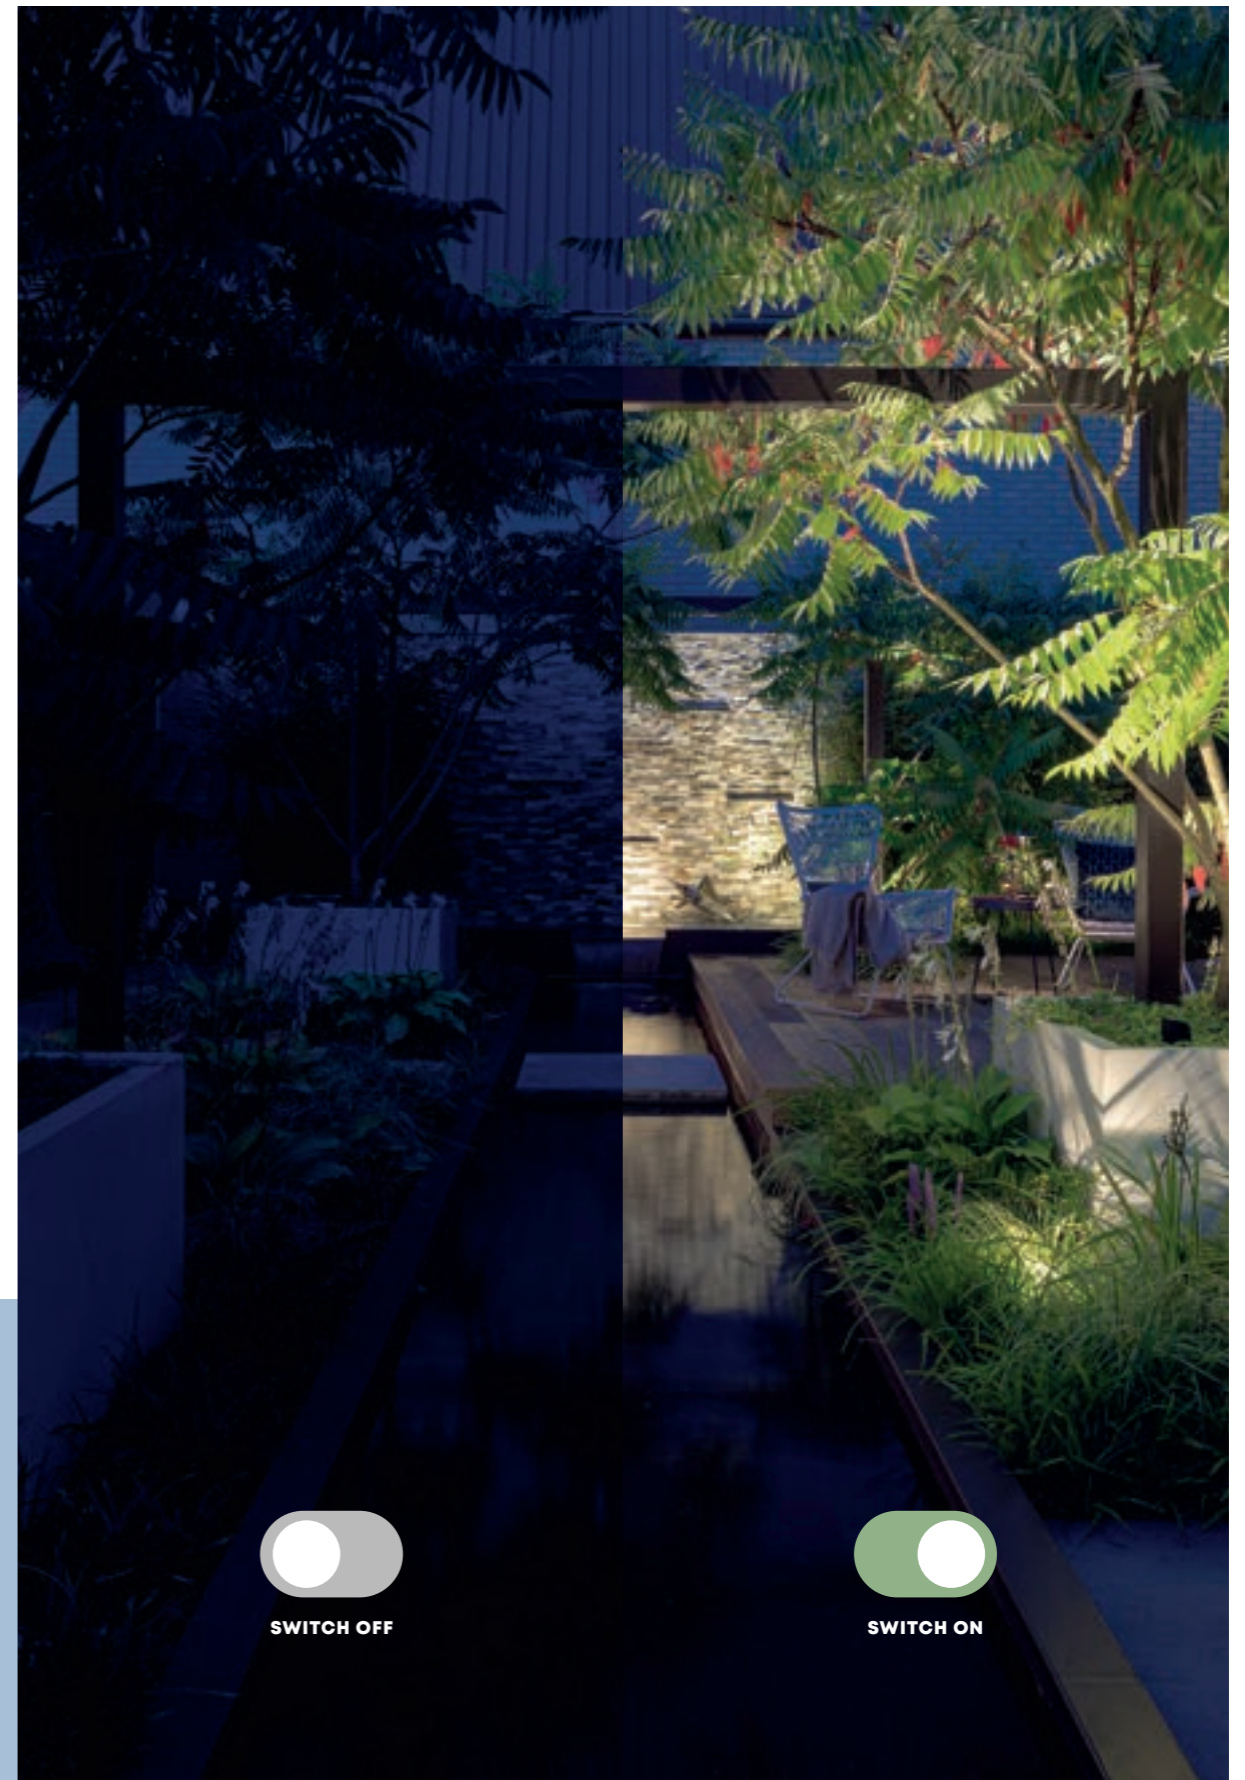

THE PERFECT LIGHT

- Elegant warm white light
- The most beautiful colours and contrasts
- Sustainable and energy-efficient

SMART

- in-lite app
- Focus on simplicity
- Pioneering and innovative

You can also follow us at [@inlite_global](https://www.instagram.com/inlite_global)

INNOVATION

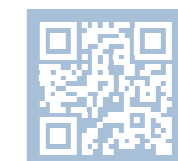

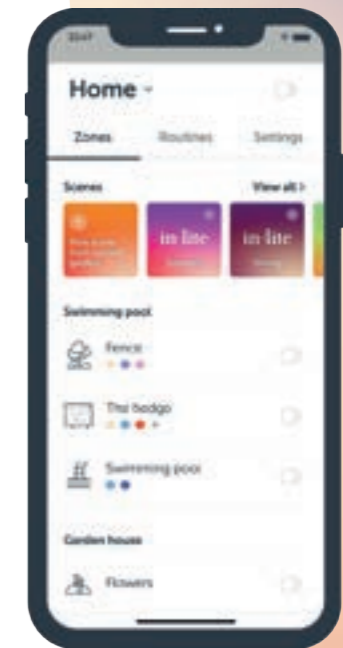

SMART LIGHTING

At its core, in-lite's Smart system comprises a **SMART HUB** and the **in-lite app**. The smart transformer enables you to connect up any fixture from in-lite's range and control each line using a **Bluetooth Low Energy** connection. Next add (individually controllable) Smart lights, such as **SMART SCOPE TONE**, **SMART FLUX TONE** and **SMART EVO FLEX TONE**. Thus transforming your garden into a colourful, elegant whole.

Ease of use is key to the in-lite app. Setting routines is straightforward and allows you to decide what time the lights will turn on and off. You can also add the **SMART MOVE** wireless motion detector or an accessory like the **SMART BRIDGE**. This enables you to integrate your Bluetooth system into your WiFi network, giving you control over your lighting anytime, anywhere. The in-lite Smart system can also be integrated into home automation systems such as Google Home, Apple HomeKit and Amazon Alexa.

Smart lighting is the future of our range. The in-lite app is continuously developing, enabling us to permanently offer Smart system users new options and optimisations such as in-lite Scenes and in-lite Energy Insight – a bespoke sustainability plan for your garden.

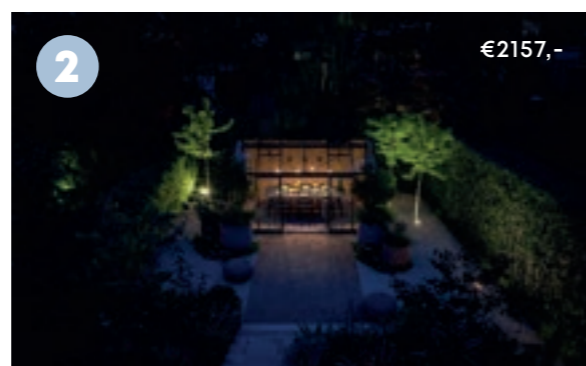

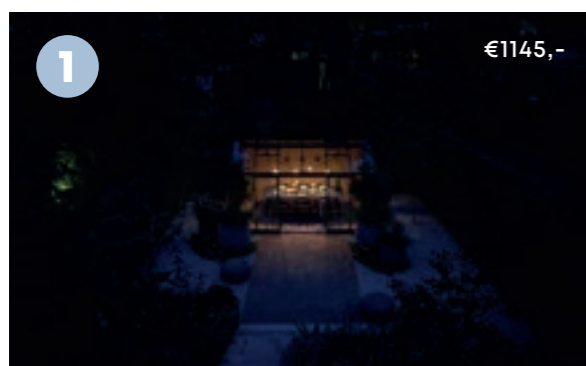

Keen to find out more about in-lite Smart and be kept informed of all developments? Scan the QR code.

CREATING GARDENS

IN PHASES

The unique in-lite system makes it possible to expand your lighting step by step. You start by installing a sufficient number of cables in the garden and over time, you simply add new fixtures as desired. Your dream garden will be a reality in no time!

IN-LITE CONCEPT

SWAY

ONE WITH NATURE

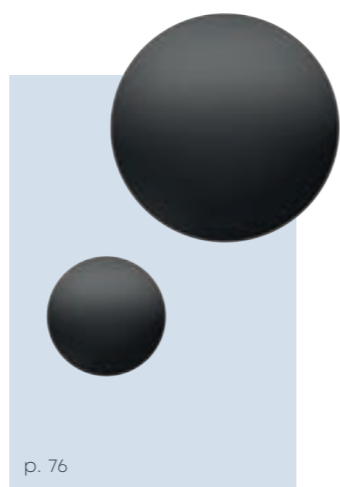

The concept encompasses bollards, wall lights, hanging lights in two different colours (Black and Pearl Grey) and a table light. The idea underlying the design is that a fixture can be in harmony with the garden and hence does not always need to stand out. The minimalistic design gives rise to an elegant, friendly appearance that is very contemporary.

p. 84

p. 56

p. 76

p. 59

IN-LITE CONCEPT

ACE

PERFECT SPACE

The concept encompasses bollards and wall lights in four different colours: Dark Grey, White, Rosé Silver and Corten. Anyone can benefit from this concept. The design is minimalistic and the light produces distinctively sleek illumination.

p. 68

p. 68

p. 68

IN-LITE CONCEPT

EVO

PERFECT EVOLUTION

The concept encompasses bollards, wall lights, RECESSED and line lighting. EVO stands for design and premium quality. The fixtures sport an architectural design which fits in perfectly in gardens with sharp lines and high-quality materials.

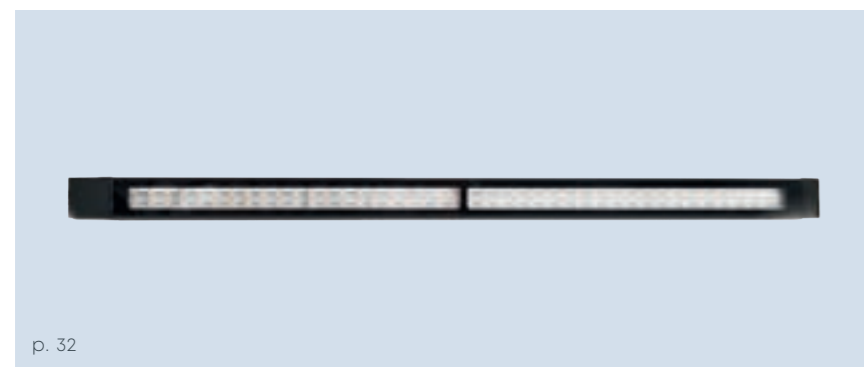

p. 63

p. 32

p. 71

p. 32

INNOVATION

BY IN-LITE

in-lite designs and produces all its products itself. Throughout the design process we examine the options in the garden and what lighting solution is required to provide perfect illumination. Moreover, our fundamental principle is to keep our products as simple as possible. And simple products call for innovative ideas.

MODULAR DESIGN

Various fixtures and concepts in the in-lite range have a modular structure. This approach ensures that you have maximum freedom and can put together your end product yourself. Combinations of product colour and fixture height are possible.

We take things one step further with AIM, our newest series of designer spots. Here, we have developed a patent-pending method that allows light sources to be literally stacked. Thus enabling you to decide for yourself whether you would like to use AIM with one, two or three light sources. Offering the user maximum flexibility and expandability.

in-lite | human dimming

in-lite Human Dimming allows you to dim fixtures manually without having to touch them. This technology features in various hanging lights and SWAY TABLE, the wireless table light.

in-lite | motion

in-lite Motion stems from the need to be able to tilt a light source without having to open the fixture. Thus preventing moisture issues and preserving maximum functionality. This applies to BIG NERO. Placing a magnet on the light source enables you to tilt the light source and create your desired illumination yourself.

CREATING GARDENS

IN PHASES

The unique in-lite system makes it possible to expand your lighting step by step. You start by installing a sufficient number of cables in the garden and over time, you simply add new fixtures as desired. Your dream garden will be a reality in no time!

IN-LITE X PARTNERS

Cooperation is a top priority for in-lite. Joining forces and creating unique gardens together. Anything to make outdoor living more appealing and more pleasurable. Somewhere to enjoy your garden in a different way each season.

For many years now, in-lite has had a solid partnership with MBI. MBI's GeoCeramica® is the ideal choice for high-quality, maintenance-free, easy-to-install ceramic paving. Add integrated lighting from in-lite and you will be able to enjoy your garden night and day.

Adezz's planters are in-lite-ready. CARREZ and CIRCUM are the first products of this unique collaboration. The planters come with a profile into which in-lite's SMART EVO FLEX LED strip can easily be embedded. Thus creating a single elegant unit that will add a unique dimension to your garden.

Last year saw in-lite and Big Green Egg team up to release a fixture together. It has been a success. And that's an understatement! Our renowned SWAY TABLE has been given a makeover. Are you a true Big Green Egg fan? Then hurry and add this to your collection.

Big Green Egg

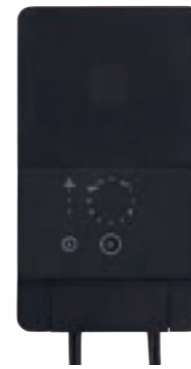

Adezz

MBI

SYSTEM

HUB-50

A high-quality transformer with touch screen operation and maximum installation value of 50 VA, equipped with two lines that can be controlled jointly.

HUB-100

A high-quality transformer with touch screen operation and maximum installation value of 100 VA, equipped with two lines that can be controlled jointly.

SMART HUB-150

SMART HUB-150 has an installation value of 150 VA and comes with three lines that can be controlled individually using the in-lite app.

SMART HUB-300

SMART HUB-300 has an installation value of 300 VA and comes with three lines that can be controlled individually using the in-lite app.

*At max. load of 130VA per cable

HUBS ¹

HUB is a transformer that controls the garden lighting. A choice of four different hubs is available: HUB-50, HUB-100 and SMART HUB-150 and SMART HUB-300. Add up the VA value of your lighting to find out which transformer will suit your garden.

CABLES ²

The cable can be rolled out from the transformer and guided along the fixtures. There are two types of cables available: 14/2 and 10/2.

CABLE SPLITTING ³

Want to split or branch a cable? Use a cable connector (CC-2) to split the cable plan in no time.

EASY-LOCK ⁴

Every fixture comes with an EASY-LOCK. This is used to connect the fixture at any point along the main cable.

ACCESSORIES ⁵

Is an in-lite fixture's cable too short? Simply use the extension cords. Another useful accessory is the splitter, which lets you connect two fixtures to one extension cord.

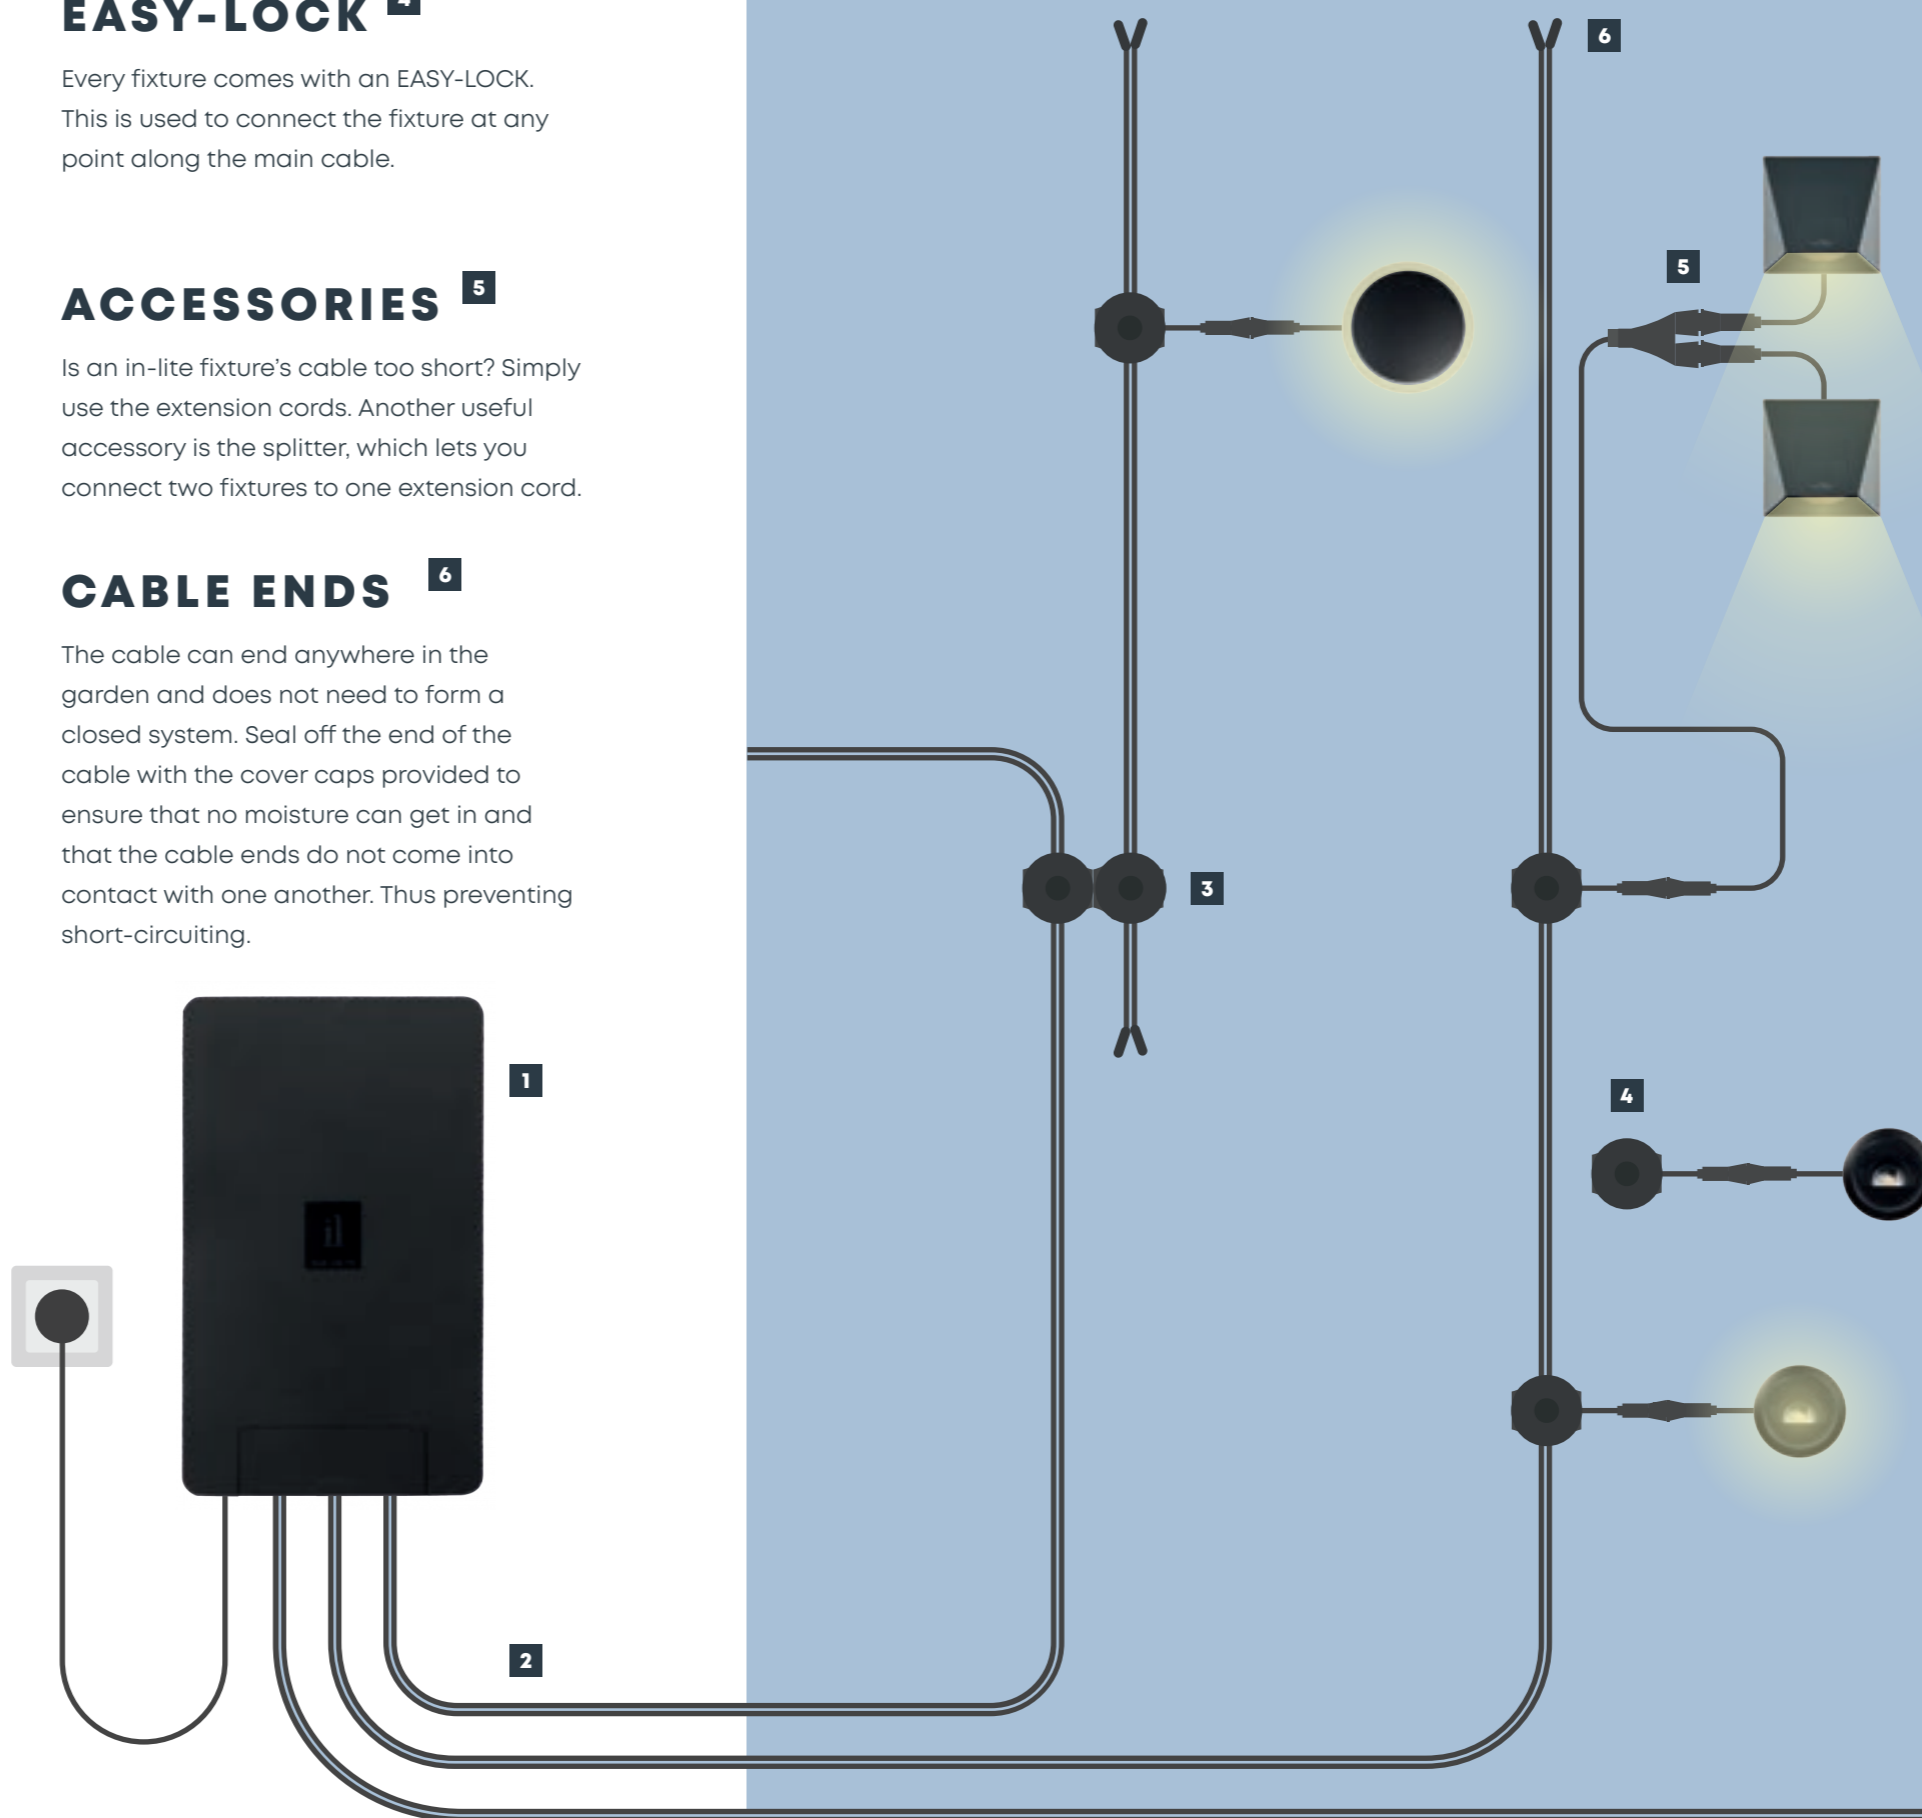

CABLE ENDS ⁶

The cable can end anywhere in the garden and does not need to form a closed system. Seal off the end of the cable with the cover caps provided to ensure that no moisture can get in and that the cable ends do not come into contact with one another. Thus preventing short-circuiting.

INSTALLATION INSTRUCTIONS

Install HUB at least 50 cm from the ground - away from precipitation - such as indoors, in a shed or under a canopy. If you do wish to site your HUB outdoors, always use a PROTECTOR. In the absence of a PROTECTOR the warranty will be invalidated.

ACCESSORIES

FOR THE SYSTEM

Got a great lighting plan for your garden and worried that you won't be able to buy it all at once? Expanding your plan step by step is easy. You start by installing sufficient cabling in the garden and over time, you simply add new fixtures as desired. Your dream garden will be a reality in no time!

SMART EXTENDERS

This Smart product has been developed to improve the Bluetooth signal in and around your home. In some homes, external factors like thickly insulated walls and steel structures make Bluetooth connections suboptimal. The quality of the different Bluetooth receivers in smartphones currently in circulation varies widely too. SMART EXTENDER will improve your connection in such situations.

SMART BRIDGE

SMART BRIDGE is an in-lite SMART system accessory that creates a bridge to the internet. The Internet connection makes it possible to integrate the in-lite SMART system into 'Smart Home' systems such as Google Home, Apple HomeKit and Amazon Alexa. The lighting can also be activated by means of voice commands, for instance. Simply connect your Smart Home system.

HUB PROTECTORS

SMART HUB PROTECTOR has been developed to provide the refined technology in the SMART HUB-150 transformer with even better protection. This accessory will extend the lifespan of the product if it will not be possible to install the SMART HUB-150 somewhere covered. If you do install the transformer outside without a PROTECTOR, the warranty will be invalidated.

MOTION DETECTORS

Just like the SMART HUB, the wireless SMART MOVE can be controlled via Bluetooth connection using the in-lite app. The time for which the lighting stays on after motion is detected is adjustable by the minute from 1 to 60 minutes using the in-lite app.

TOUCH DIMMER

Keen to effortlessly adjust the intensity of your wall lights and hanging lights? Then discover the TOUCH DIMMER. This handy accessory will enable you to dim any outdoor light individually, with four different light settings to choose from. And best of all, you do not need a SMART system for the TOUCH DIMMER, making ease of use accessible.

WELCOME IN THE IN-LITE PLAYGROUND

Be inspired by what in-lite can do to make your
outdoor space unique. Enjoy the magic.

CUSTOMER SERVICE **EXTRAORDINARY**

Please feel free to put any questions you may have about in-lite products, installation and warranty to our experienced customer service team. They will be happy to help to ensure that you are able to enjoy your elegantly lit outdoor space each and every day. Looking for further inspiration? Then check out our social media channels and our website.

Own a unique outdoor space and looking for advice?

Our aim is to illuminate every outdoor space as uniquely, creatively and magically as possible. We design elegant lighting plans for the largest private gardens, terraces of hotels or restaurants and semi-public outdoor spaces. If an on-site lighting demo is required, LAB is the team to take care of this.

EXPERIENCE IN-LITE AT OUR DEALERSHIPS
